

Antonio Maldonado Echevarria

Lima, Perú · [linkedin.com/in/antoniomaldonadotech](https://www.linkedin.com/in/antoniomaldonadotech) · portfoliomalsebasmalelf.vercel.app · +51 904 271 328 · antoniomaldonadotech@gmail.com

Frontend Developer specialized in building scalable web interfaces and SaaS products across real estate, fintech, and cultural platforms. I turn design systems and business requirements into clean, performant code — working closely with teams and clients from first sprint to production. Currently at Caffelli, with prior experience at We Rent, Finniu, and more — focused on React ecosystems, component-driven architecture, and AI-assisted development workflows.

EXPERIENCE

Caffelli

Frontend Developer

US (Remote)

January 2026 – Present

- Developed and optimized Caffelli's corporate website using WordPress, Tailwind CSS, and Docker, implementing animations, new blocks, and responsive layouts from Figma prototypes.
- Worked on Intel's website redesigning full page layouts with WordPress and Elementor, delivering pixel-perfect implementations based on design team specifications.
- Collaborated's within a team distributing tasks across projects in Jira, quickly adapting to new technologies and workflows in a fully remote US-based environment.

We rent

Frontend Developer

Madrid, Spain (Remote)

August 2025 – April 2026

- Hired by REDI to develop NEO, a multi-role SaaS dashboard for real estate management, directly impacting the experience of hundreds of end users.
- Delivered end-to-end modules for Work Orders and Incidents with backend service integration, covering all system roles: tenant, manager, administrator, and company admin.
- Contributed to NEO's internal component library, standardizing the design system across the entire platform.
- Integrated Claude MCP into the development workflow, reducing implementation time and improving code quality.

Finniu

Frontend Developer

San Borja, Perú

February – June 2025

- Led a full frontend rebranding from Figma to production across 9 views for a fintech investment platform with 500+ investors and 2,000+ managed operations.
- Built an interactive investment simulator with real-time ROI calculation, implementing wizard-style flows with progressive step validation.
- Implemented JWT authentication (login, signup, and secure session management) and integrated GraphQL APIs, developing queries and mutations from the frontend.
- Designed reusable components in React and Next.js with TailwindCSS, maintaining visual consistency and best practices with Git.

Devdatep Consulting

Frontend Developer

Lima, Perú

June – December 2024

- Designed and implemented user interfaces using React, TypeScript, and TailwindCSS, translating Figma prototypes into pixel-perfect implementations for a freestyle rap events platform.
- Developed and optimized reusable React components with modular TailwindCSS styles, speeding up development and maintaining visual consistency across the project.
- Participated in code and design reviews to ensure quality standards, accessibility, and Mobile First principles across all views.
- Documented processes and technical decisions to support knowledge sharing within the development team.

8 nortes

Frontend Developer

Comas, Perú

April – May 2024

- Designed and developed the official website for a Lima cultural collective using Astro and TailwindCSS, implementing a consistent design system built for easy future updates.
- Led the project end-to-end: Figma design with the client, project gallery, events system, and final deployment.
- Achieved top Lighthouse performance scores using Astro's static rendering, applying accessibility best practices for a diverse audience.

LoloBelo

Frontend Developer

Puente Piedra, Perú

January – February 2024

- Designed and developed an interactive web menu with Astro and TailwindCSS, replacing a PDF-based system with a responsive, real-time digital experience.
- Led the project end-to-end: Figma design with the client, restaurant API integration for dynamic content, and final deployment.
- Integrated the restaurant's API to display dynamic menu images and data, delivering a real-time, up-to-date experience.
- Optimized performance using Astro's static rendering, achieving minimal load times and a smooth mobile experience.

ADDITIONAL SKILLS

- Proficient in Figma, with experience leading projects and teams.
- Familiar with AI-assisted development workflows using Claude MCP.

LANGUAGES

- Native Spanish.
- Conversational English.
